Super Babies
(NatureScope Amazing Mammals I: Page 33)

Directions:
1. Print up Super Babies picture page for each team (cut the animal pictures out beforehand)
2. Divide the class into teams of four or five and have them choose a team captain.
3. To play the game, the teacher will read a description of an amazing animal baby.
4. Teams decide as quickly as possible which baby the teacher is talking about.
5. Team captains run to the front of the room with the picture of the animal.

Descriptions for the Teacher:

Duck-billed Platypus: I did something most mammals can’t do: I hatched from an egg!

Giraffe: I fall five feet to the ground when I am born!

Elephant: Before I am born, I grow inside my mother for almost two years!

Blue Whale: I weigh three tons at birth. And I’ll gain about 200 pounds a day just by drinking my mother’s milk!

Red Kangaroo: I’m no bigger than a penny when I am born. But when I grow up I’ll be as tall as a fully-grown person!

Zebra: I can run and play only an hour after I am born!
